Caroline DeSchutter  
The Corporation of the Town of Plympton-Wyoming  
546 Niagara Street  
Wyoming, Ontario  
N0N 1T0

Dear Ms. DeSchutter,

**Re: Plympton-Wyoming Distribution System – First Permit and Licence**

Please find enclosed the first Drinking Water Works Permit ("Permit") and Municipal Drinking Water Licence ("Licence") for the Plympton-Wyoming Distribution System as well as information regarding appeal provisions in the *Safe Drinking Water Act, 2002*.

Since this is the first Permit and Licence that have been issued for this drinking water system, it is important to note the following:

- The drinking water system name on the Licence and Permit may have been modified from the name that was provided in your application. The Ministry is currently reviewing drinking water system names to ensure consistency across all of its programs. You will be notified of any future changes with respect to the Drinking Water Information System (DWIS).
- All previous Certificates of Approval that were valid for the drinking water system prior to the issuance of the first Permit and Licence are now expired as per section 36(4)(a) of the *Safe Drinking Water Act, 2002*. However, condition 6.0 in Schedule B of the Permit allows you to continue with or to proceed with the construction of works that have been previously authorized by Certificates of Approval but that have not yet been completed.
- With the issuance of the first Permit and Licence the authority for the alteration and operation of the drinking water system will now be processed through amendments to these documents.
- The Permit authorizes specified alterations to the drinking water system including the addition, modification, replacement or extension of watermains that meet certain conditions set out in the Permit. Any alterations that do not meet the conditions will require a Permit amendment.
- The Transfer of Review Program, where it exists, will no longer be applicable for alterations to the drinking water system now that the first Permit and Licence have been issued for the system. Please note that the Transfer of Review Program will continue for applications for sewage collection and storm water management.

The following documents and forms are also enclosed:

- Watermain Design Criteria for Future Alterations Authorized Under a Drinking Water Works Permit
- Guide For Applying for DWWP Amendments, Licence Amendments, Licence Renewals & New System Applications
- Guide for Applying for Fragmentation & Relief from Regulatory Requirements – Municipal Drinking Water Systems & Non-Municipal Drinking Water Systems
- Applications Respecting Drinking Water Works Permits and Municipal Drinking Water Licences
- Application for Fragmentation or Relief from Regulatory Requirements – Drinking Water Systems
- Form 1 – Record of Watermains Authorized as a Future Alteration
- Form 2 – Record of Minor Modifications or Replacements to the Drinking Water System
- Form 3 – Record of Addition, Modification or Replacement of Equipment Discharging a Contaminant of Concern to the Atmosphere

If you have any further questions, please contact Girish Mehta, P.Eng. 416-314-8217.

Sincerely,

Indra R. Prashad, P.Eng.  
Director, Part V, SDWA
