This shall not include Uses specifically listed as Zone Exceptions or given alternative zone Regulations in the applicable Zone's section of the By-law.

4.5 INCORPORATION OF ZONING MAP

The location and boundaries of the Zones established by this By-law are shown on the Zoning Maps hereto appended as Schedules A, and Parts 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 and 12 to Schedule A which are hereby incorporated into and declared to form part of this By-law.

- a) Street, Lane, Right-of-Way, or Watercourse

Unless otherwise shown, a Street, Lane, railway Right-of-Way, electrical transmission line Right-of-Way or Watercourse shall be included within the Zone of the adjoining property on either side thereof and where such Street, Lane, Right-of-Way or Watercourse serves as a boundary between two (2) or more different Zones, the centre line of such Street, Lane, Right-of-Way or Watercourse extending in the general direction of the long dimension thereof, shall be deemed to be the boundary between Zones.

- b) Lot Lines

Where any Zone boundary is not shown to be a Street, Lane, Right-of-Way or Watercourse, and where the boundary approximately follows Lot Lines, such Lot Lines shall be deemed to be the Zone boundary.

- c) Closed Street, Lane or Right-of-Way

In the event a Street, Lane or Right-of-Way and the limits of any portion thereof is closed, the property formerly within such Street, Lane or Right-of-Way shall be included within the Zone adjoining the property, and where such Street, Lane, or Right-of-Way was a Zone boundary, the new Zone boundary shall be the former centre line of the closed Street, Lane or Right-of-Way.

Certain lands within the Municipality are subject to Fill, Construction and Alteration Regulations pursuant to the Conservation Authorities Act, R.S.O. 1990, Chap. C.27, as amended. The limits of these Conservation Authority regulated areas are shown for informational purposes on the Schedules to this By-law. Where any Zone boundary is shown as following the limits of a Conservation Authority regulated area, the Zone boundary shall be deemed to correspond with the limits of such Regulated area. In the event that an application is made to, and Approved by,

the Conservation Authority for a permit pursuant to the Fill, Construction and Alteration Regulations, the lands for which such permit is issued shall be deemed to be included within the same Zone as the adjoining non-regulated lands.

e) Woodlot (WD), Wetland (WET) and Significant Natural Area (SNA) Zone boundaries (B/L 107/2010) shall be deemed to correspond with the limits of the natural feature it represents as such feature Existed on the date of passing of this By-law. Alterations of the natural feature's boundary through removal of trees or by other means subsequent to the date of passing of this By-law shall not alter the limits of the Zone boundary. Portions of a woodlot for which an exception from by-law 15 of 2002 (County of Lambton Tree Cutting By-law) has been obtained from the County of Lambton Woodlot Committee, however shall be deemed outside the Woodlot (WD) Zone boundary.

permit application is made for the Erection of a new Dwelling, but shall exclude any Dwelling that is destroyed by erosion, flooding, wave uprush, slope instability or any other natural disaster or hazard associated with proximity to Lake Huron. To be deemed an Existing Dwelling, the Dwelling must be determined by the By-law Enforcement Officer prior to its removal to be in a condition not requiring demolition or significant repairs or alterations.

- g) **“LOW EROSION AREA”** shall include any Lot listed in **Table B** as having an Erosion Allowance depth less than 30 metres.
- h) **“MEDIUM EROSION AREA”** shall include any Lot listed in **Table B** as having an Erosion Allowance depth greater than or equal to 30 metres and less than or equal to 50 metres.

The Erosion allowance is a projection of 100 years worth of erosion based on an average annual erosion rate determined from observed historic erosion rates. Where the bluff height exceeds 8m, the Erosion Allowance is a minimum of 15m. The Erosion Allowance abuts the Primary Hazard Area on the side farthest from the Lake.

In the case of Lots located in the area known as Hillsboro Beach South, the Primary Hazard Area shall include any portion of a Lot located within 15 metres of the High Water Mark. Type A Land Use*	1.1
Type B Land Use*	2.2

*See Section 2, Definitions, in Zoning By-law.

TABLE 5: Permanent Manure or Material Storage Types

Solid Manure: 18% dry matter, or more

Liquid Manure: Less than 18% dry matter

Digestate: Less than 18% dry matter

Storage Odour Potential	Solid or Liquid System	Inside or Outside Livestock Facility	Number referred to in Table 6	Description of permanent manure storages being sited by MDS II, or encroached upon through MDS I application
Very Low	Solid	Inside	V1	Solid, inside, bedded pack (manure accumulates under livestock over time)
		Outside	V2	Solid, outside, covered (cover keeps off precipitation to prevent runoff)
			V3	Solid, outside, no cover, greater than or equal 30% dry matter (manure is dry enough that a flowpath option can be used for runoff control (Nutrient Management Act, 2002))
			V4	Solid, outside, no cover, 18% to less than 30% dry matter, with covered liquid runoff storage (manure not dry enough to soak up precipitation, so a liquid runoff storage needed but it has a permanent, tight cover)
	Liquid	Inside	V5	Liquid, inside, underneath slatted floor (manure is stored under the animals in the barn)
		Outside	V6	Liquid, outside, with a permanent, tight fitting cover (negative pressure tarp, concrete lid, inflatable dome, etc.)
			V7	Liquid, (digestate), outside, no cover (all manure has been treated through anaerobic digestion, or a similar process that reduces odours)
Low	Solid	Outside	L1	Solid, outside, no cover, 18% to less than 30% dry matter, with uncovered liquid runoff storage (manure not dry enough to soak up precipitation, so a liquid low runoff storage needed, but it is uncovered, producing more odour than in V4 above)
	Liquid	Outside	L2	Liquid, outside, with a permanent floating cover (tarps, foam panels, etc.)
Medium	Liquid	Outside	M1	Liquid, outside, no cover, straight-walled storage (usually circular or rectangular, concrete or steel storages)
			M2	Liquid, outside, roof, but with open sides (roof keeps off precipitation, but the open sides allow wind to travel over the manure and carry odours)
High	Liquid	Outside	H1	Liquid, outside, no cover, sloped-sided storage (earthen manure storages, but not earthen runoff storages associated with a solid manure storage which are L 1 above)
