

June 27, 2024

**Re: Stonehouse Drain (2024) Court of Revision**

On June 26, 2024 the Court of Revision was held for the Stonehouse Drain (2024). The following motions were adopted by the Court:

- That the benefit amount for property roll 360.002.00165 be reduced by \$5,000 and that this amount (\$5,000) be added to the assessment for Plympton-Wyoming Roads (Isabella Street).
- That the benefit amount for property roll 360.002.00200 [culvert#5] be reduced by \$5,000 and that this amount (\$5,000) be added to the assessment for Plympton-Wyoming Roads (Isabella Street).
- That the benefitting land assessment for future culvert replacement of culverts #3, 4 & 5 be reduced from 40% to 31% and that 9% be added to the assessment for Plympton-Wyoming Roads (Isabella Street).

Based on the motion, the existing Schedule of Assessment, Estimated Net Assessment Schedule and maintenance provisions for the culverts (Page 12) shall be removed and the following pages shall replace them as part of the report.

Yours truly,

Josh Warner, P. Eng.  
R. Dobbin Engineering Inc.

April 10, 2024

The Mayor and Council  
The Town of Plympton-Wyoming  
546 Niagara Street  
Wyoming, ON  
N0N 1T0

Gentlemen and Mesdames:

**Re: Stonehouse Drain (2024)**

In accordance with your instructions, R. Dobbin Engineering has undertaken an examination with regards to improving the Stonehouse Drain in the Town of Plympton-Wyoming.

Authorization under the Drainage Act

This is an Engineer's Report that has been prepared under Section 78 of the Drainage Act. R. Dobbin Engineering Inc. was appointed by council on February 10<sup>th</sup>, 2023.

Section 78 of the Drainage Act states that, where, for the better use, maintenance or repair of any drainage works constructed under a bylaw passed under this Act, or of lands or roads, it is considered expedient to change the course of the drainage works, or to make a new outlet for the whole or any part of the drainage works, or to construct a tile drain under the bed of the whole or any part of the drainage works as ancillary thereto, or to construct, reconstruct or extend embankments, walls, dykes, dams, reservoirs, bridges, pumping stations, or other protective works as ancillary to the drainage works, or to otherwise improve, extend an outlet or alter the drainage works or to cover the whole or any part of it, or to consolidate two or more drainage works, the Council whose duty it is to maintain and repair the drainage works or any part thereof may, without a petition required under Section 4 but on the report of an Engineer appointed by it, undertake and complete the drainage works as set forth in such report.

Existing Drainage

The Stonehouse Drain consists of an open channel which outlets to Davies Creek at Marthaville Road (9/10 sideroad allowance) just north of Discovery Line (concession 11/12 blind line). It extends upstream generally in a northeasterly direction through Lots

10 and 11, Concession 12, Lots 11, 12, and 13, Concession 13, and Lots 13, 14 15, and 16, Concession 14 to Churchill Line just east of Oil Heritage Road in the Township of Enniskillen.

The Stonehouse Drain extends upstream into the Town of Plympton-Wyoming along the east side of Oil Heritage Road, thence in a north westerly direction to the west side of the lot 14/15 line, thence northerly, thence northeasterly to the west side of Broadway Street in Concession 1. The closed portion of the Stonehouse Drain continues easterly and northerly until its head at the easterly limit between Sarnia and Brooke Streets.

The last Engineer's Report on the Stonehouse Drain is dated February 21, 2007. This report replaced the culvert in the E ½ of Lot 12, Concession 13 in the Township of Enniskillen.

Under an Engineer's Report dated December 15, 1999 the maintenance schedules for the open channel in the Township of Enniskillen and Town of Plympton-Wyoming were updated under Section 76 of the Drainage Act.

Under an Engineer's Report dated November 20, 1980 the farm bridge in Lot 10, Concession 11 in the Township of Enniskillen was replaced.

Under an Engineer's Report dated October 13, 1966 the portions of the open channel on Zone Street and downstream to the west side of Broadway Street was enclosed, channel repairs were completed to Broadway Street and a new farm bridge was installed in the south part of the W ½ of Lot 15, Concession 1.

In 2004 maintenance was done on the closed portion of the drain with a hydrovac and the open channel was cleaned to Churchill Line.

#### Drain Classification

The open portion of the Stonehouse Drain is currently classified as a "Class C" drain from Broadway Street to Marthaville Road according to the Department of Fisheries and Oceans (DFO) classification as presented by the Ontario Ministry of Agriculture, Food and Rural Affairs' Agricultural Information Atlas.

#### Approvals

The general plan and the DFO's Request for Review Form were submitted on October 3, 2023 to ensure compliance.

A Letter of Advice was received from the DFO on December 4, 2023 and is included in this report.

The St. Clair Regional Conservation Authority (SCRCA) was contacted to inform them of the project. The SCRCA confirmed that an environmental appraisal will not be required on this project.

A permit must be issued by the SCRCA prior to any construction taking place.

### Site Meeting

A site meeting for the Stonehouse Drain was held on April 19<sup>th</sup>, 2023. The following were present:

- Josh Warner (R. Dobbin Engineering)
- Elizabeth Cummings (Drainage and Engineering Coordinator, Town of Plympton-Wyoming)
- Sarah Snetsinger (St. Clair Region Conservation Authority)
- George Feenstra (Landowner)
- Darlene Feenstra (Landowner)
- Bill Lammers (Landowner)
- Lynn Helps (Landowner)
- Be Jamieson (Landowner)
- Harry Donkers (Landowner)
- Ann Donkers (Landowner)
- Frank Gustin (Representative for Wyoming Baptist Church)
- Ruth Lamoureux (Landowner)
- Suzette Doyle (Landowner)
- Darryl Poort (Landowner)
- Brad Burnard (Landowner) (Virtual)
- Jon Bielby (Landowner) (Virtual)
- Todd Clark (Landowner) (Virtual)
- Jeremy (Landowner) (Virtual)

The following is a brief summary of the meeting:

- General discussion of the Drainage Act and Landowners rights under the Drainage Act.
- Landowners were made aware that there has been a request for improvements on the Stonehouse Drain and that we would be investigating improvements to the

open channel within the Town of Plympton-Wyoming and any other requests that are brought forward. The open channel improvements may need to extend into Enniskillen in order to obtain a sufficient outlet.

- The Landowner of #534 Zone Street stated that water pools on their property.
  - Josh Warner and Elizabeth Cummings later met with these Landowners and determined that some grading in the front of their property should resolve the issue and that no work was required to the municipal drain as a result of the concern.
- The Landowner of #342 Broadway Street requested matting on their property.
  - Josh Warner stated that this can be looked into but there would be additional cost to complete this.
- The Landowner of the property with Roll Number 02-001-60 stated that there are sections on their property where the drain is very shallow and the banks often flood over.

#### Video of Storm Sewer (May 2023)

A video was completed of the existing storm sewer portion of the Stonehouse Drain to evaluate if any work should be completed under this report. Below is a summary of the findings:

MH9-MH10: Roots through connection at service to #486 Sarnia Street

MH9-MH8: Sanitary running through MH8

MH8-MH7: Encrustation at Station 0+109

Built Up Sediment near MH7

MH7-MH6: No Notes

MH6-MH5: 20% full of water at Stations 0+015 and 0+053

MH5-MH4: Half full of water. Sediment, stopped at 0+005

MH4-MH5: Half full of water. Sediment, stopped at 0+002

MH4-Outlet: Under Water

Based on the above, R. Dobbin Engineering Inc. recommends that following the completion of the channel improvements, the storm sewer portion of the Stonehouse Drain be re-flushed and videoed again to ensure the sediment is moved downstream once an improved outlet is achieved.

Existing Conditions of Channel and Culverts

Below is a summary of the condition of the existing culverts:

<b>Culvert Number / Station / County/Town's Number</b>	<b>Location</b>	<b>Existing Culvert Size</b>	<b>Condition</b>	<b>Recommendation</b>
1 (1+330)	Churchill Line	3050mm Span Concrete Box Culvert	Good – Replaced in 2007	Leave
2 (1+583) 21-5-382	Oil Heritage Road	3050mm Span Concrete Box Culvert	Good - Structure placement in 1976 with Culvert Extension in 1985	Leave
3 (1+989)	Roll Number 02-001-60	1800mm dia. CSP	Okay- Rusted below Spring Line. Undersized for Today's Standard.	Leave
4 (3+190)	Roll Number 02-001-65	1800mm dia. CSP	Good – But Perched, Undersized and Installed outside of Drainage Report.	Leave
5 (3+207)	Roll Number 02-002	1600mm dia. CSP	Good – But Perched 250mm above grade line. Undersized.	Replace

In general, the drain has built up sediment, some erosion and is overflowing in areas where there is minimal channel depth. It was also observed that a buffer strip would be beneficial to the drain to reduce erosion.

Design

The proposed culverts have been designed to provide outlet for a 1 in 5-year storm event.

Draft Report dated February 2, 2024

A draft report for the Stonehouse Drain, dated February 2, 2024, was sent to the entire watershed. A meeting was held on March 6, 2024. The following were present:

- Josh Warner (R. Dobbin Engineering)
- John VanKlaveren (Council Representative, Town of Plympton-Wyoming)

- Elizabeth Cummings (Drainage and Engineering Coordinator, Town of Plympton-Wyoming)
- Paul DaSilva (Director of Public Works, Town of Plympton-Wyoming)
- Pat Davidson (Landowner)
- Walt Manicom (Landowner)
- Cheryl Sullivan (Landowner)
- Gary Van De Hoef (Landowner)
- Rob Johnson (Landowner)
- Donna Johnson (Landowner)
- Mervin McLay (Landowner)
- Mary McLay (Landowner)
- Doug Braley (Landowner)
- Deborah McLean (Landowner)
- Larry Dinell (Landowner)
- Bill Lammers (Landowner)
- Marion Smith (Landowner)
- Lyle Huether (Landowner)
- Trisha Handsor (Landowner)
- Mitch Wilson (Landowner)
- Pat Steele (Landowner)
- Eric Steele (Landowner)
- Hellen Wells (Landowner)
- Darlene Feenstra (Landowner)
- George Feenstra (Landowner)
- Charlie Phipps (Landowner)
- Sharon Phipps (Landowner)
- Jim Eastman (Landowner)
- Landowner of #650 Ketter Way (Landowner) (Virtual)
- Angelique Blake (Landowner) (Virtual)
- Lynn Helps (Landowner) (Virtual)
- Mike Salisbury (Landowner) (Virtual)
- Janet Ramsey (Landowner) (Virtual)
- Landowner of #736 Norman Street (Landowner) (Virtual)
- Landowner of #486 Sarnia Street (Landowner) (Virtual)
- Bonnie (Landowner) (Virtual)

The following is a brief summary of the meeting:

- General discussion of the Drainage Act and Landowners rights under the Drainage Act.
- Josh Warner presented an overview of the report, the Drainage Act procedures and the basis for assessments.
- Landowners questioned why the work was required. It was stated that it has been some time since work has been completed on the channel and that the Town initiated the request to have work completed on the drain in order to provide improved drainage for the watershed. It was also stated that there is water backing up in the storm sewer portion of the drainage works as a result of sediment built up in the channel.
- It was discussed that a separate meeting would be held with #342 and #354 Broadway Street to review the working areas, levelling vs trucking, etc. on site.
  - Following a subsequent meeting, the report was revised to remove the installation of mats for #342 Broadway Street and change the working areas for construction.

### Discussion

An additional meeting was held to review Culvert No. 4 and 5. It was verified that they are the same size culvert and at approximately the same elevation. R. Dobbin Engineering is of the opinion that they should both be replaced as they are undersized, above the proposed grade line and were installed outside of a drainage report.

### Recommendations

It is therefore recommended that the following work be carried out:

1. The open channel portion of the Stonehouse Drain shall be improved in order to provide a sufficient outlet for lands within the Town of Plympton-Wyoming. A 0.50m buffer strip shall be incorporated as part of the drainage works on both sides of the channel from Station 1+020 to 3+512.
2. A berm shall be installed on the east bank in a low area on the property with Roll Number 02-001-60 in order to reduce the amount of water that overtops the banks during rain events.
3. Culvert No. 4 and No. 5 shall be replaced. Future specifications shall be developed for the replacement of Culvert No. 3.

4. A Schedule of Maintenance shall be developed for the open and closed portions of the Stonehouse Drain within the Town of Plympton-Wyoming.
5. After the completion of construction, the remainder of the storm sewer shall be flushed and videoed.

#### Estimate of Cost

It is recommended that the work be carried out in accordance with the accompanying Specification of Work and Profile that forms part of this Report. There has been prepared an Estimate of Cost in the amount of \$365,105.00, including preparation of the report, attending the Meeting to Consider the Report, attending the Court of Revision and estimates for tendering, construction inspection, permitting and contract administration. Appearances before appeal bodies have not been included in the cost estimate.

A Plan has been prepared showing the location of the work and the approximate drainage area. A Profile is included showing the depths and grades of the proposed work.

#### Assessment

As per Section 21 of the Drainage Act, the Engineer in his report shall assess for benefit and outlet for each parcel of land and road liable for assessment.

Lands, roads, buildings, utilities, or other structures that are increased in value or are more easily maintained as a result of the construction, improvement, maintenance, or repair of a drainage works may be assessed for benefit. (Section 22)

Lands and roads that use a drainage works as an outlet, or for which, when the drainage works is constructed or improved, an improved outlet is provided either directly or indirectly through the medium of any other drainage works or of a swale, ravine, creek, or watercourse may be assessed for outlet. The assessment for outlet shall be based on the volume and rate of flow of the water artificially caused to flow into the drainage works from the lands and roads liable for such assessments. (Section 23)

The Engineer may assess for special benefit any lands for which special benefits have been provided by the drainage works. (Section 24)

A Schedule of Assessment for the lands and roads affected by the work and therefore liable for the cost thereof will be prepared as per the Drainage Act. Also, assessments may be made against any public utility or road authority, as per Section 26 of the Drainage Act, for any increased cost for the removal or relocation of any of its facilities and plant that may be necessitated by the construction or maintenance of the drainage

works. Items outside those identified in this report shall be assessed to the utility or road authority as per Section 26 of the Drainage Act plus a portion of the engineering (25% of the construction cost).

The cost of any fees for permits or approvals or any extra work required by any affected utility or road authority shall be assessed to that organization requiring the permit, approval, or extra work.

The proposed work has generally been assessed in the following manner, including all estimated fees, taxes and disbursements:

1. As per Section 26 of the Drainage Act, the roads and utilities have been assessed the increased cost of the drainage works caused by the existence of the works of the public utility or road.
2. The replacement and engineering for the culvert replacements has been assessed with 40% of the cost applied as a benefit assessment to the abutting property and the remainder of the cost assessed as an outlet assessment to upstream lands and roads based on equivalent hectares.
3. The channel improvements have been assessed with 35% of the cost applied as a benefit assessment to abutting property(ies) and the remainder of the cost assessed as an outlet assessment to upstream lands and roads based on equivalent hectares.
4. The additional cost of trucking, beyond levelling, has been assessed as a special benefit assessment to the abutting property(ies).
5. The engineering required to delineate the drainage area and prepare the plan have been assessed evenly to the properties within the watershed as an outlet assessment.
6. The storm sewer flushing and videoing have been assessed in the same proportions as the Schedule of Maintenance No. 2. The Schedule of Maintenance No. 2 has been assessed with 70% of the cost applied as a benefit assessment to the road authority, a \$1,200 benefit assessment for abutting properties (1.2% of the total cost) and the remainder of the cost assessed as an outlet assessment to upstream lands and roads based on equivalent hectares.

All final costs included in the cost estimate of this report shall be pro-rated based on the Schedule of Assessment. Any additional costs shall be assessed in a manner as determined by the Engineer.

### Allowances

Under Section 29 of the Drainage Act, the Engineer in his report shall estimate and allow in money to the Owner of any land that it is necessary to use for the construction or improvement of a drainage works or for the disposal of material removed from drainage works. This shall be considered an allowance for right-of-way.

Under Section 30 of the Drainage Act, the Engineer shall determine the amount to be paid to persons entitled thereto for damage, if any, to ornamental trees, lawns, fences, land and crops occasioned by the disposal of material removed from a drainage works. This shall be considered an allowance for damages.

Allowances have been made, where appropriate, as per Section 29 of the Drainage Act for right-of-way for the potential re-sloping that would increase the area occupied by the drain and as per Section 30 of the Drainage Act for damages to lands and crops. Allowances for right of way are based on a land value of \$50,000.00 per hectare (approximately \$20,000.00 per acre). Allowances for crop loss are based on \$2,000.00 per hectare for the first year and \$1,000.00 for the second year (\$3,000.00 per hectare total).

### Access and Working Area

Access to the work site for construction and future maintenance of the open channel portion of the drain shall be from Oil Heritage Road, Broadway Street, Churchill Line, through the access at the property with Roll Number 02-001-60, along the access road to the treatment plant just south of #484 Broadway Street, and along the length of the drainage works. All accesses shall be restricted to a width of 6m and shall generally be along property lines and existing accesses or as otherwise agreed to with the Landowner(s).

The working area for construction and future maintenance of the open channel shall be as below:

Station 1+020 to 1+160: The working area shall be 12m wide and shall generally be along the east side of the channel. The material shall be levelled in this section of the drain. Access shall be gained from either Churchill Line or Oil Heritage Road and the access shall be restricted to within the property with Roll Number 160-003.

Station 1+160 to 1+730: The working area from Station 1+583 to 1+673 (start of trees) shall be 6m wide and shall generally be along the north side of the channel. Otherwise, in this section, the working area shall be 6m wide and shall generally be along the west/south side of the channel. The material shall be trucked offsite in this section of the

drain. If the Contractor is unable to complete the channel improvements around the bins at #4524 Churchill Line the working area shall extend to east side of the channel (#4528 Churchill Line) adjacent the bins.

Station 1+730 to 1+989: The working area shall be 12m wide and shall generally be along the south side of the channel. The material shall be levelled in this section of the drain.

Station 1+989 to 2+858: The working area shall be 12m wide and shall generally be along the north/east side of the channel. The material shall be levelled in this section of the drain. Some of the material in this section shall be utilized to build a berm in the low area on the east side of the channel.

Station 2+858 to 3+462: The working area shall be 12m wide and shall generally be along the south side of the channel. The material shall be levelled in this section of the drain.

Station 3+462 to 3+512: The working area shall be 6m wide and shall generally be along the north side of the channel. The material shall be trucked offsite in this section of the drain.

The working area shall include 3m on the side opposite the side identified above in order to allow for the installation of buffer strips. If, at the discretion of the Drainage Superintendent or Engineer, there is erosion on the channel opposite the working area access may be gained along the channel and nearest culvert to repair the bank.

Access for future culvert maintenance and channel repair on a single property shall be from the properties in which the culvert or channel is being repaired or maintained. If maintenance is being done on multiple properties access shall be gained from the nearest roadway and shall be along the length of the drainage works. The working area at each culvert shall extend 10 metres from the bank on both sides and for 10 metres along the channel on either side of the culvert.

The working area for future maintenance and repair of the storm sewer portion of the Stonehouse Drain shall be within the Road, Alley Right of Ways and Registered Storm Easements.

Restrictions

No trees and shrubs shall be planted nor shall permanent structures be erected within 10 metres of the open channel and 5 meters of the closed drain without prior written permission of Council.

Attention is also drawn to Sections 80 and 82 of the Drainage Act, which refer to the removal of obstructions in a drain and damage caused to a drain.

Agricultural Grant

If available, it is recommended that application for subsidy be made for eligible agricultural properties. Any assessments against non-agricultural properties are shown separately in the Schedule of Assessment.

Maintenance

The Storm Sewer from Station 3+512 to 3+547 shall be maintained and repaired at the expense of the owner of Broadway Street. In the future, a minimum 1800mm dia. Concrete Storm Sewer may be installed directly from MH #3 to the open channel. If completed, all pipes shall be extended and the existing pipes shall be abandoned as part of the drainage works.

The Stonehouse Drain shall be maintained and repaired with the specifications and drawings contained in this Engineer’s Report. The tile drain and open channel shall be maintained and repaired in the same relative portions as contained in the applicable Schedule of Maintenance contained in this report. The additional cost of trucking, beyond levelling, shall be assessed to the property requesting the trucking.

The culverts shall be maintained and repaired with a culvert length required to have an 8m top width as shown on the profile with rip rap end walls, assessed in the following manner:

Culvert Number	Benefiting Lands	Upstream Properties Based on Equivalent Hectares as Contained in SofM1	Isabella Street (Town of Plympton-Wyoming)
3, 4 & 5	31%	60%	9%

Below outlines the existing and future culvert sizes proposed under this report. The bolded culverts represent culverts that are proposed to be replaced under this report.

<b>Culvert Number</b>	<b>Location</b>	<b>Existing Culvert Size</b>	<b>Minimum Replacement Size</b>
3	Roll Number 02-001-60	1800mm dia. CSP	2800x1950mm dia. CSPA
4	<b>Roll Number 02-001-65</b>	<b>1800mm dia. CSP</b>	<b>2500x1830mm dia. CSPA</b>
5	<b>Roll Number 02-002</b>	<b>1600mm dia. CSP</b>	<b>2500x1830mm dia. CSPA</b>

If an owner requests an additional length of culvert beyond that required to have an 8m top width or an asphalt travel surface the extra cost shall be borne by the Landowner making the request including the future maintenance and repair. The location of the 8m top width shall be determined by the Drainage Superintendent and shall generally be in the primary access location and shall include any headwalls.

The road culverts shall be maintained and repaired at the expense of the road authority as per Section 26 of the Drainage Act.

Each property is allowed one access culvert for each municipal drain with any second culvert on the property maintained and repaired 100% by the owner.

The buffer strip is to extend 0.5 metres from the top of the bank on both sides of the channel. If the buffer strip extends less than this due to encroaching cropping practices, the buffer strip shall be maintained with 100% of the cost assessed to the property. Otherwise, the buffer strip shall be maintained and repaired in the same relative portions as contained in the enclosed Schedule of Maintenance.

Yours truly,

Josh Warner, P. Eng.  
R. Dobbin Engineering Inc.

**ALLOWANCES**

Allowances have been made as per Sections 29 & 30 of the Drainage Act for Right of Way and damages to lands and crops

## **SPECIFICATION OF WORK**

### **1. Location**

The location of the proposed and future work outlined in this specification is in Lot 14 and 15, Concession 1 and 2 in the Town of Plympton-Wyoming and Lot 13, Concession 14 in the Township of Enniskillen.

### **2. Scope of Work**

The work to be included in this specification includes, but is not limited to, the following:

- Open channel improvements
- Buffer Strip
- Culvert replacements
- Future Storm Sewer Repair

### **3. General**

Each tenderer must inspect the site prior to submitting their tender and satisfy themselves by personal examination as to the local conditions that may be encountered during this project. The Contractor shall make allowance in their tender for any difficulties which they may encounter. Quantities or any information supplied by the Engineer is not guaranteed and is for reference only.

All work and materials shall be to the satisfaction of the Drainage Superintendent who may vary these specifications as to minor details but in no way decrease the proposed capacity of the drain.

The Contractor shall provide all labour, equipment, and supervision necessary to complete the work as shown in the Plans and described in these specifications. Any work not described in these specifications shall be completed according to the Ontario Provincial Standard Specifications and Standard Drawings.

Any equivalents shall be approved in writing by the Engineer prior to ordering.

#### **4. Health and Safety**

The Contractor at all times shall be responsible for health and safety on the worksite including ensuring that all employees wear suitable personal protective equipment including safety boots and hard hats.

When applicable the Contractor shall be responsible for traffic control as per the Ontario Traffic Manual Book 7 – Temporary Conditions (latest revision).

The Contractor shall be responsible to ensure that all procedures are followed under the Occupational Health and Safety Act to ensure that work sites are safe and that accidents are prevented. In the event of a serious or recurring problem, a notice of non-compliance will be issued. The Contractor will be responsible for reacting immediately to any deficiency and correcting any potential health and safety risk. Continuous disregard for any requirement of the Occupational Health and Safety Act could be cause for the issuance of a stop work order or even termination of the Contract.

The Contractor shall also ensure that only competent workers are employed onsite and that appropriate training and certification is supplied to all employees.

The Contractor shall submit their traffic control plan within 10 working days of notice of award. Road closures will not be permitted on this project without the approval of the County of Lambton and Town of Plympton-Wyoming.

#### **5. Workplace Safety and Insurance Board**

The Contractor hereby certifies that all employees and officers working on the project are covered by benefits provided by the Contractor. The WSIB Clearance Certificate must be furnished prior to the execution of the Contract and updated every 90 days.

#### **6. Utilities**

The Contractor is responsible for organizing locates and exposing all the utilities along the length of the drainage works. If any utilities interfere with the proposed drainage works in a manner not shown on the accompanying Estimate of Cost or profile the Contractor shall notify the Drainage Superintendent and Engineer.

The Contractor is responsible for coordinating the replacement of additional utilities with the utility company if they interfere with the proposed drain. All costs for the utility to replace their services will be outside of this report and shall be borne by the utility as per Section 26 of the Drainage Act.

All additional costs to work around and organize replacement of the utilities not included in the estimate shall be tracked separately and the cost plus a portion of the engineering (25% of the cost) shall be borne by that utility.

## **7. Pre-Construction Meeting**

There is a requirement for a pre-construction meeting to be held prior to any construction taking place. The meeting will be scheduled by the Contractor. Contact information will be provided to the Contractor by the Engineer. The affected Landowners, Engineer, County of Lambton and the Town of Plympton-Wyoming shall be invited. The Contractor shall notify all parties at least one week prior to wanting to hold a pre-construction meeting.

## **8. Benchmarks**

The benchmarks are based on geodetic elevations. Elevations are available at the locations shown on the Plan and Profile drawings. Where these elevations are on existing structures to be replaced, they shall be transferred by the Contractor prior to the removal.

The Contractor is required to complete a benchmark loop prior to construction to verify the benchmarks. If discrepancies exist the Contractor must notify the Drainage Superintendent and Engineer prior to completing any work.

## **9. Traffic Control**

Access and driveways to private properties shall not be obstructed longer than the minimum time necessary for the work and shall be reinstated as soon as possible all to the satisfaction of the Engineer. The Contractor shall schedule any obstruction of existing driveways and accesses with the owners at least two full working days in advance. The Traffic Plan must be approved by the Town prior to the commencement of any road closures.

- a) The Contractor shall supply, erect and maintain all detour signs and special signs necessary for detours to divert traffic from the area under construction as directed by the Drainage Superintendent or Engineer. All this work shall be at the Contractor's expense.
- b) The Contractor shall be responsible for supplying, erecting and maintaining all signs, supports, barricades, flashers, cones, etc. in the construction area and at the boundaries of the work as part of the above detours, all to the satisfaction of the Engineer or Drainage Superintendent. All this work shall be done by the Contractor at their own expense.

- c) The Contractor shall not be allowed to proceed with construction activities unless proper signage and flagmen are present. Flagging procedures, signage and detours shall conform to the recommendations of Book 7, Temporary Conditions, Ontario Traffic Manual, issued by the Ministry of Transportation. Conformance shall be enforced by the Ministry of Labour Inspector.

## **10. Access and Working Area**

Access to the work site for construction and future maintenance of the open channel portion of the drain shall be from Oil Heritage Road, Broadway Street, Churchill Line, through the access at the property with Roll Number 02-001-60, along the access road to the treatment plant just south of #484 Broadway Street, and along the length of the drainage works. All accesses shall be restricted to a width of 6m and shall generally be along property lines and existing accesses or as otherwise agreed to with the Landowner(s).

The working area for construction and future maintenance of the open channel shall be as below:

Station 1+020 to 1+160: The working area shall be 12m wide and shall generally be along the east side of the channel. The material shall be levelled in this section of the drain. Access shall be gained from either Churchill Line or Oil Heritage Road and the access shall be restricted to within the property with Roll Number 160-003.

Station 1+160 to 1+730: The working area from Station 1+583 to 1+673 (start of trees) shall be 6m wide and shall generally be along the north side of the channel. Otherwise, in this section, the working area shall be 6m wide and shall generally be along the west/south side of the channel. The material shall be trucked offsite in this section of the drain. If the Contractor is unable to complete the channel improvements around the bins at #4524 Churchill Line the working area shall extend to east side of the channel (#4528 Churchill Line) adjacent the bins.

Station 1+730 to 1+989: The working area shall be 12m wide and shall generally be along the south side of the channel. The material shall be levelled in this section of the drain.

Station 1+989 to 2+858: The working area shall be 12m wide and shall generally be along the north/east side of the channel. The material shall be levelled in this section of

the drain. Some of the material in this section shall be utilized to build a berm in the low area on the east side of the channel.

Station 2+858 to 3+462: The working area shall be 12m wide and shall generally be along the south side of the channel. The material shall be levelled in this section of the drain.

Station 3+462 to 3+512: The working area shall be 6m wide and shall generally be along the north side of the channel. The material shall be trucked offsite in this section of the drain.

The working area shall include 3m on the side opposite the side identified above in order to allow for the installation of buffer strips. If, at the discretion of the Drainage Superintendent or Engineer, there is erosion on the channel opposite the working area access may be gained along the channel and nearest culvert to repair the bank.

Access for future culvert maintenance and channel repair on a single property shall be from the properties in which the culvert or channel is being repaired or maintained. If maintenance is being done on multiple properties access shall be gained from the nearest roadway and shall be along the length of the drainage works. The working area at each culvert shall extend 10 metres from the bank on both sides and for 10 metres along the channel on either side of the culvert.

The working area for future maintenance and repair of the storm sewer portion of the Stonehouse Drain shall be within the Road, Alley Right of Ways and Registered Storm Easements.

## **11. Removals**

The culverts and any native backfill material, when required, shall be removed in their entirety. The culvert, backfill and the concrete rubble shall be disposed offsite at the expense of the Contractor. Native backfill shall not be reused in the culvert installation. Any broken concrete or rip rap (concrete bags) from the existing structures shall be disposed offsite at the expense of the Contractor unless determined re-usable by the Drainage Superintendent or Engineer.

The Contractor shall work around the existing fences and signs if they are able to. If the existing fences and signs are required to be removed, they shall be removed and re-installed in the same location with the existing materials. The Contractor shall take photos before the removal of any fence and after its reinstallation. All work in connection

with fences and signs shall be carried out in a careful manner so they are replaced in as good a condition as the existing materials permit.

Where the culverts are not being replaced, the Contractor shall restore the channel in these sections to match the adjacent side slopes and shall restore them with straw matting and seed.

## **12. Brushing and Tree Removal**

For construction and future maintenance of the drain, all brush, stumps, trees, vegetation, etc. within the working area, the drain bottom, along the bank where the work is taking place and on the opposite side were impeding the flow of the drain, as determined by the Drainage Superintendent or Engineer, shall be removed.

It is recommended that a mechanical grinder attached to an excavator be used for the removal of brush and trees. Any brush and trees too large to grind shall be close cut. The Contractor shall stockpile the trees and brush in a single pile on the property in which they were removed or dispose of the trees and brush offsite. Where brush and trees are removed within a bush section of the drain the trees and brush shall be disposed of within the bush at the limits of the working area. The Contractor is responsible for the burning of the trees and brush with the exception of those location in the bush sections. The Contractor is responsible for obtaining all necessary permits for any disposal sites. Burning of the trees and brush is subject to local bylaws and guidelines of the Ministry of the Environment Conservation and Parks.

Certain trees may be left in place at the direction of the Drainage Superintendent or Engineer. Trees may be limbed and piled for firewood, instead of burned, at the request of a Landowner.

## **13. Excavation of Open Channel**

For construction and future maintenance, the open channel shall be excavated and maintained to the depths and grades as per the profile and drawings as contained in this Engineers Report. The channel shall be excavated to the proper depth using a laser or similar approved device with a labourer onsite to ensure correctness of grade and to confirm location of tile ends.

The excavated material shall generally be cast on the side it is being excavated from, except across finished lawns where it shall be trucked off site at the expense of the Contractor. Material removed from the road culverts shall also be trucked offsite at the expense of the Contractor. All other excavated material shall be cast at least 1.5 metres

clear of the bank. Excavated material shall not be placed in low runs or swales outletting surface water to the channel. The excavated material shall be levelled to a maximum depth of 150mm and left in a condition suitable for cultivation. This shall include the removal of any rocks larger than 10cm in diameter and any debris/wood that could damage or plug farm equipment. Leveling shall occur when the material is dry enough to do so as determined by the Drainage Superintendent or Engineer. All high spots above grade shall be removed. The sediment shall be removed leaving a rounded bottom with the intent not to undercut the existing side slopes. All material unfit for placing on farmlands shall be disposed of offsite by the Contractor.

The north bank shall be re-sloped to 2:1 from Station 2+127 to 2+262. Additional re-sloping to 2:1 shall be completed at the discretion of the Drainage Superintendent or Engineer at the established unit prices. All areas to be re-sloped shall have the adjacent working area stripped of topsoil. Once the excavated material is levelled the topsoil shall be placed on top in a condition suitable for cultivation.

For future maintenance, all excavated material shall be levelled, except across finished lawns where it shall be trucked. Across agricultural properties, a Landowner may request to have the excavated material trucked. The additional cost for trucking, beyond levelling, shall be assessed to the Landowner and will not be eligible for grant.

The existing culverts shall be cleaned to the proposed grade line. The Contractor shall ensure the box culvert footings are not undermined as part of the excavation work. As part of this item the material shall be trucked at the road culverts and levelled in the adjacent fields at the access culverts.

#### **14. Rip Rap**

Rip rap shall be made up of 150mm to 300mm quarry stone or approved equal. The area to receive the rip rap shall first be graded to allow the placement of the rip rap to a depth of 400mm below finished grade. After grading, a layer of filter fabric (Mirafi P150 or approved equal) is to be placed with any joints overlapped a minimum of 600mm. Rip rap shall then be placed with the smaller pieces placed in the gaps and voids to give it a uniform appearance.

The areas that require rip rap are identified below:

- 10 tonnes for a Rock Chute on the north side of the channel at Station 1+850
- 20 tonnes on the north side of the channel at Station 2+172
- 20 tonnes on the north side of the channel at Station 2+262
- 5 tonnes on the north side of the channel at Station 2+284

- 20 tonnes on the west side of the channel at Station 1+996
- 5 tonnes on the east side of the channel at Station 2+500
- 10 tonnes at the proposed pipe at Station 2+580
- 20 tonnes on the west side of the channel at Station 2+610
- 20 tonnes on the west side of the channel at Station 2+772
- 5 tonnes on the west side of the channel at Station 2+799
- 10 tonnes on the north side of the channel at Station 2+858
- 5 tonnes on the north side of the channel at Station 2+886 at a tile outlet
- 10 tonnes on the north side of the channel at Station 3+038 at a tile outlet
- 20 tonnes on the north side of the channel at Station 3+075
- 100 tonnes for channel stabilization downstream of 3+512 (near access road to treatment plant)

The above quantities are estimates only and the rip rap shall be placed at the discretion of the Engineer or Drainage Superintendent at the time of construction.

### **15. Installation of Culverts**

The Contractor is required to notify the Landowner forty-eight (48) hours prior to the removal of a culvert.

The Contractor shall supply, install, and backfill aluminized corrugated steel pipe (CSP) with a minimum wall thickness of 2.8mm. Corrugated Steel Pipe Arches and culverts under roadways shall have a minimum wall thickness of 3.5mm. All corrugation profiles shall be of helical lock seam manufacture using 68 x 13mm corrugations for 1600mm dia. pipe and smaller and 125 x 25mm corrugations for 1800mm dia. pipe and larger. Pipe with 125 x 25mm corrugations shall be used if 68 x 13mm corrugations are not available.

The high-density polyethylene (HDPE) smooth wall pipe (320 kPa) shall be CSA Approved with bell and spigot joints.

The culverts designated to be replaced in the future under this report shall be examined after any cleanout of the open channel as to its condition. If it is found to be in disrepair (i.e. there are holes corroded in the bottom or sides) it shall be replaced as per these specifications.

The culverts shall be installed generally in the same location or as approved by the Drainage Superintendent or Engineer. The culverts shall be installed with the invert 10% (minimum 150mm) below the original channel bottom elevation unless otherwise shown

in order to achieve the minimum cover. It is the Contractors responsibility to ensure that the minimum cover is achieved when backfilling the culverts.

All culverts may have concrete block or rip rap end walls. The access culverts shall be assessed, as per the report, to provide an 8m access width. If an owner requests a longer culvert than that required to achieve an 8m top width, please refer to the report.

Any tile outlets extended as a result of a culvert shall be extended at the landowner's expense. The pipes that shall be extended upstream or downstream of the proposed culvert shall be done with non-perforated HDPE agricultural tubing with a manufactured coupling, elbow and rodent grate.

### **Access Culverts:**

The bottom of the excavation shall be excavated to a minimum of 100mm below the proposed invert. The pipe shall be bedded with ¾" clear stone. When the pipe has been installed to the proper grade and depth, the excavation shall be backfilled with ¾" clear stone and wrapped in filter fabric from the bottom of the excavation to the spring line of the pipe. Care shall be taken to ensure that the backfill on either side of the culvert does not differ by more than 300mm so that the pipe is not displaced. The access culverts shall be backfilled from the spring line to within 150mm of finished grade with Granular "B" Type II. The top 150mm shall be backfilled with compacted 100% crushed Granular "A" material to finished grade. If asphalt is proposed, the asphalt shall be HL4 and shall match the existing thickness. In these cases, the compacted Granular "A" shall occupy 150mm below the proposed asphalt.

The length of culverts specified in the profile are based on utilizing rip rap end walls. If concrete block end walls are proposed the culvert shall be decreased in length accordingly (a 10m culvert with concrete block end walls will provide an 8m top width).

If rip rap end walls are used, they shall consist of 150mm x 300mm quarry stone or approved equal. The area to receive the rip rap shall be graded to a depth of 400mm below finished grade. Filter fabric (Mirafi P150 or approved equal) shall then be placed with any joints overlapped a minimum 600mm. The quarry stone shall then be placed with the smaller pieces placed in the gaps and voids to give it a uniform appearance.

If concrete block end walls are used, they shall consist of concrete blocks with dimensions of approx. 600mm x 600mm x 1200mm, 600mm x 600mm x 2400mm or 300mm x 600mm x 1200mm as required. 600mm x 600mm x 2400mm concrete blocks will be paid at twice the unit price established per block, all others will be at a unit of 1. The top of the culvert shall govern block elevation. The correct block shall be set with the

top of the block equal to the top of the culvert. 2400mm wide concrete blocks shall be used as the top block on arch and larger round pipes in order to span between the culvert top and the supporting block. The blocks shall be set at each end of the culvert so that each row of blocks will be offset approx. 100mm from the row below. The bottom row shall consist of one block placed parallel to the culvert. The blocks shall be imbedded a minimum of 300mm into each bank and shall extend into the drain bottom to match the pipe invert or below. Erosion protection shall be placed on the banks next to the end walls. The erosion protection shall consist of 150mm x 300mm quarry stone over filter fabric (Mirafi P150 or approved equal). It shall extend 500mm upstream or downstream and from top of bank to top of bank at each end wall.

The blocks shall be placed over a layer of filter fabric (Mirafi P150 or approved equal). The culvert shall be backfilled in conjunction with the placement of the blocks. The gaps between the culvert and the blocks shall be filled with concrete cinder blocks/bricks and mortar to give the end wall a finished appearance.

It is the Contractors responsibility to ensure that adequate cover is obtained prior to crossing the culvert in accordance with the manufacturer's recommendations. It is the Contractors responsibility to ensure that the minimum cover is achieved when backfilling the culverts. The minimum cover for CSP under Highway Loading shall be 1/6 of the culvert span, and shall be no less than 300mm.

Below outlines the existing and future culvert sizes proposed under this report. The bolded culverts represent culverts that are proposed to be replaced under this report.

<b>Culvert Number</b>	<b>Location</b>	<b>Existing Culvert Size</b>	<b>Minimum Replacement Size</b>
3	Roll Number 02-001-60	1800mm dia. CSP	2800x1950mm dia. CSPA
<b>4</b>	<b>Roll Number 02-001-65</b>	<b>1800mm dia. CSP</b>	<b>2500x1830mm dia. CSPA</b>
<b>5</b>	<b>Roll Number 02-002</b>	<b>1600mm dia. CSP</b>	<b>2500x1830mm dia. CSPA</b>

## 16. Culvert Maintenance

The Contractor shall be responsible for maintenance of the access culverts for a period of one year after their installation. This will include repairing any settlement areas on the travel surface with Granular "A" and/or topsoil and seed.

## **17. Subsurface Drainage**

All existing subsurface drains encountered during construction of the open channel shall be reconnected or extended to the open channel unless otherwise noted on the drawings or as directed by the Drainage Superintendent or Engineer.

A suitable length of equivalent sized PE agricultural tubing shall be used to connect the drain to the open channel. Manufactured fittings shall connect the PE tile to the existing drain. The connections shall be carefully backfilled to ensure there is adequate support under the pipe and large clumps of clay do not displace the tile.

Tile outlets larger than 150mm in diameter, or as determined by the Drainage Superintendent or Engineer at the time of construction, require erosion protection and rodent grates. The erosion protection made up of rip rap and filter fabric shall be installed on the embankment slope from 0.3m above the tile outlet to the channel bottom. The erosion protection shall be 1.0m wide. Rip rap shall be made up of 150mm to 300mm quarry stone or approved equal. The area to receive the rip rap shall first be graded to allow the placement of the rip below finished grade. After grading, a layer of filter fabric (Mirafi P270 or approved equal) is to be placed with any joints overlapped a minimum of 600mm. Rip rap shall then be placed with the smaller pieces placed in the gaps and voids to give it a uniform appearance.

A 250mm dia. CSP from the north at Station 3+038 and a pipe from the west at Station 2+610 shall be extended as part of this item.

## **18. Berm complete with Pipe and Flap Gate**

A berm shall be installed along the east bank of the channel in order to reduce flooding to the adjacent lands from Station 2+555 to 2+658. The berm shall have a minimum elevation of 209.70m, shall have a 0.5m top and minimum of 2:1 side slopes. It shall be restored with double straw matting and seed. The excavated material shall be used to create the berm.

At the low point 6m of 300mm dia. HDPE pipe shall be installed complete with a flap gate. The HDPE pipe shall be 320 kPa. The flap gate shall be a stainless-steel drainage gate or approved equivalent. The pipe shall have rip rap on both the inlet and outlet ends.

## **19. Storm Sewer (Future)**

All work shall conform to OPSS 401 and OPSS 410. The pipe sizes and grade shall be as per the drawings.

Pipe material shall be concrete pipe, CSA A257.2, 100-D or approved equivalent. Laser control shall be used to ensure grade.

The pipe shall be bedded with Granular "A" or ¾" clear stone from 150mm below the invert to the spring line of the pipe. The pipe shall be backfilled from the spring line to the bottom of the topsoil or pavement with Granular "A" material. Where asphalt is specified, the asphalt shall match the existing thickness. All Granular "A" shall be 100% crushed stone meeting the requirements of OPSS 1010 from a quarry source. Within existing grassed areas, the top 150mm shall be screened topsoil and seed.

All granular material shall be compacted to 100% S.P.M.D.D.

Excess excavated material shall be disposed of offsite at the expense of the Contractor.

## **20. Manholes (Future)**

The manholes shall be precast concrete manholes per OPSD-701.010 complete with precast adjustment units, and frame and grates per OPSD-401.01 Type A or approved equivalent.

## **21. Buffer Strip**

A grassed buffer strip shall be incorporated into the drainage works. The buffer strip shall extend 0.5 metres from the top of the bank on both sides. The seed mixture shall be as specified in the Seeding/Restoration specification.

## **22. Seeding/Restoration and Double Straw Matting**

All disturbed side slopes and the buffer strip shall be restored/installed with double straw matting and seed. The double straw matting shall be installed according to the manufacturer's specifications.

All other areas disturbed by construction shall be restored to their pre-construction condition with 100mm of screened topsoil and seed.

If the seed has not germinated, at the discretion of the Engineer or Drainage Superintendent, prior to the one-year maintenance period, 100mm of topsoil shall be placed on the disturbed areas and hydroseeded in accordance with the seed mixture, fertilizer and application rate as shown below. This shall be paid on a time and material basis.

Seed mixture, fertilizer and application rates are as follows:

- Hydraulic mulch (2,999 kg/ha.) type “B” and water (52,700 litres/ha.) in accordance with OPSS 572 (hydroseed).

The above seed mixture shall apply unless otherwise approved by the Drainage Superintendent or Engineer.

### **23. Flushing and Videoing**

The Contractor shall arrange for flushing and videoing of the storm sewer portion of the Stonehouse Drain from MH#6 to the outlet into the open channel. The Contractor shall provide a USB drive as per OPSS 409 Standards. The Contractor shall be responsible for removing any sediment that is flushed into the open channel as part of this item. The sediment shall be disposed offsite at the expense of the Contractor.

### **24. Environmental Considerations**

The Contractor shall take care to adhere to the following considerations.

- Operate machinery in a manner that minimizes disturbance to the banks of the watercourse.
- Erosion and sediment control measures must be installed prior to construction to prevent sediment from entering the water body.
- Material shall not be placed in areas regulated by the Conservation Authority or Ministry of Natural Resources.
- All granular and erosion control materials shall be stockpiled a minimum of 3.0m from the top of the bank or excavation. Material shall not be placed in surface water runs or open inlets that enter the channel.
- All activities, including maintenance procedures, shall be controlled to prevent the entry of petroleum products, debris, rubble, concrete, or other deleterious substances into the water. Vehicle and equipment refuelling and maintenance shall be conducted away from the channel, any surface water runs, or open inlets. All waste materials shall be stockpiled well back from the top of the bank and all surface water runs and open inlets that enter the drain.
- When possible, all construction within the open channel shall be carried out during periods of low flow or in dry conditions.
- The Contractor shall conduct regular inspections and maintain erosion and sediment control measures and structures during the course of construction.

- The Contractor shall repair erosion and sediment control measures and structures if damage occurs.
- The Contractor shall remove non-biodegradable erosion and sediment control materials once site is stabilized.
- Remove all construction materials from site upon project completion.

Light duty silt fencing shall be installed down-gradient of the work for the duration of construction.

The light duty silt fencing shall be supplied and installed in accordance with OPSS 805 and OPSD 219.110. The light duty silt fencing shall be removed once the disturbed area has been re-vegetated.

**Subject: Drain Improvements, Stonehouse Drain, Plympton-Wyoming (23-HCAA-02113) – Implementation of Measures to Avoid and Mitigate the Potential for Prohibited Effects to Fish and Fish Habitat**

Dear Town of Plympton-Wyoming:

The Fish and Fish Habitat Protection Program (the Program) of Fisheries and Oceans Canada (DFO) received your proposal on October 5, 2023. We understand that you propose to:

- Re-slope and conduct a bottom cleanout of approximately 2490m of the open drain portion of Stonehouse Drain;
- Remove an existing structure on Stonehouse Drain and replace with a 15m long and 2.5m wide CSP culvert;
- Place riprap along newly graded portions of Stonehouse Drain;
- Proposed works to result in a footprint of approximately 2492m<sup>2</sup> below the ordinary high-water mark; and,
- Work in isolation of flow or open water to prevent sedimentation of the watercourse.

Our review considered the following information:

- Request for Review form and associated documents submitted on October 5, 2023;
- Email correspondence with Josh Warner on November 30, 2023 confirming additional project details.

Your proposal has been reviewed to determine whether it is likely to result in:

- the death of fish by means other than fishing and the harmful alteration, disruption or destruction of fish habitat which are prohibited under subsections 34.4(1) and 35(1) of the *Fisheries Act*;

- effects to listed aquatic species at risk, any part of their critical habitat or the residences of their individuals in a manner which is prohibited under sections 32, 33 and subsection 58(1) of the *Species at Risk Act*.

The aforementioned impacts are prohibited unless authorized under their respective legislation and regulations.

To avoid and mitigate the potential for prohibited effects to fish and fish habitat (as listed above), we recommend implementing the measures listed below:

- Plan in-water works, undertakings and activities to respect [timing windows](#) to protect fish, including their eggs, juveniles, spawning adults and/or the organisms upon which they feed and migrate;
- Capture, relocate and monitor for fish trapped within isolated, enclosed, or dewatered areas;
  - Dewater gradually to reduce the potential for stranding fish;
  - Screen intake pipes to prevent entrainment or impingement of fish
  - Use the [code of practice](#) for water intake screens;
- Apply the interim [code of practice](#) for temporary cofferdams and diversion channels;
- Limit impacts on riparian vegetation to those approved for the work, undertaking or activity;
  - Construct access points and approaches perpendicular to the watercourse or waterbody;
  - Remove vegetation or species selectively and in phases;
  - Re-vegetate the disturbed area with native species suitable for the site;
- Salvage, reinstate or match habitat structure (e.g., large wood debris, boulders, instream aquatic vegetation/substrate) to its initial state;
- Restore stream geomorphology (i.e., restore the bed and banks, gradient and contour of the waterbody) to its initial state;
- Conduct in-water undertakings and activities during periods of low flow;
- Develop and implement an Sediment Control Plan to minimize sedimentation of the waterbody during all phases of the work, undertaking or activity;
  - Conduct all in-water works, undertakings or activities in isolation of open or flowing water to reduce the introduction of sediment into the watercourse;
  - Schedule work to avoid wet, windy and rainy periods (and heed weather advisories);
  - Inspect and maintain regularly maintain the erosion and sediment control measures and structures during all phases of the project; and,
- Develop and implement a response plan to avoid a spill of deleterious substances.

Provided that you incorporate these measures into your plans, the Program is of the view that your proposal is not likely to result in the contravention of the above mentioned prohibitions and requirements.

Should your plans change or if you have omitted some information in your proposal, further review by the Program may be required. Consult our website (<http://www.dfo-mpo.gc.ca/pnw-ppe/index-eng.html>) or consult with a qualified environmental consultant to determine if further review may be necessary. It remains your responsibility to remain in compliance with the *Fisheries Act* and the *Species at Risk Act*.

It is also your *Duty to Notify* DFO if you have caused, or are about to cause, the death of fish by means other than fishing and/or the harmful alteration, disruption or destruction of fish habitat. Such notifications should be directed to (<http://www.dfo-mpo.gc.ca/pnw-ppe/CONTACT-eng.html>).

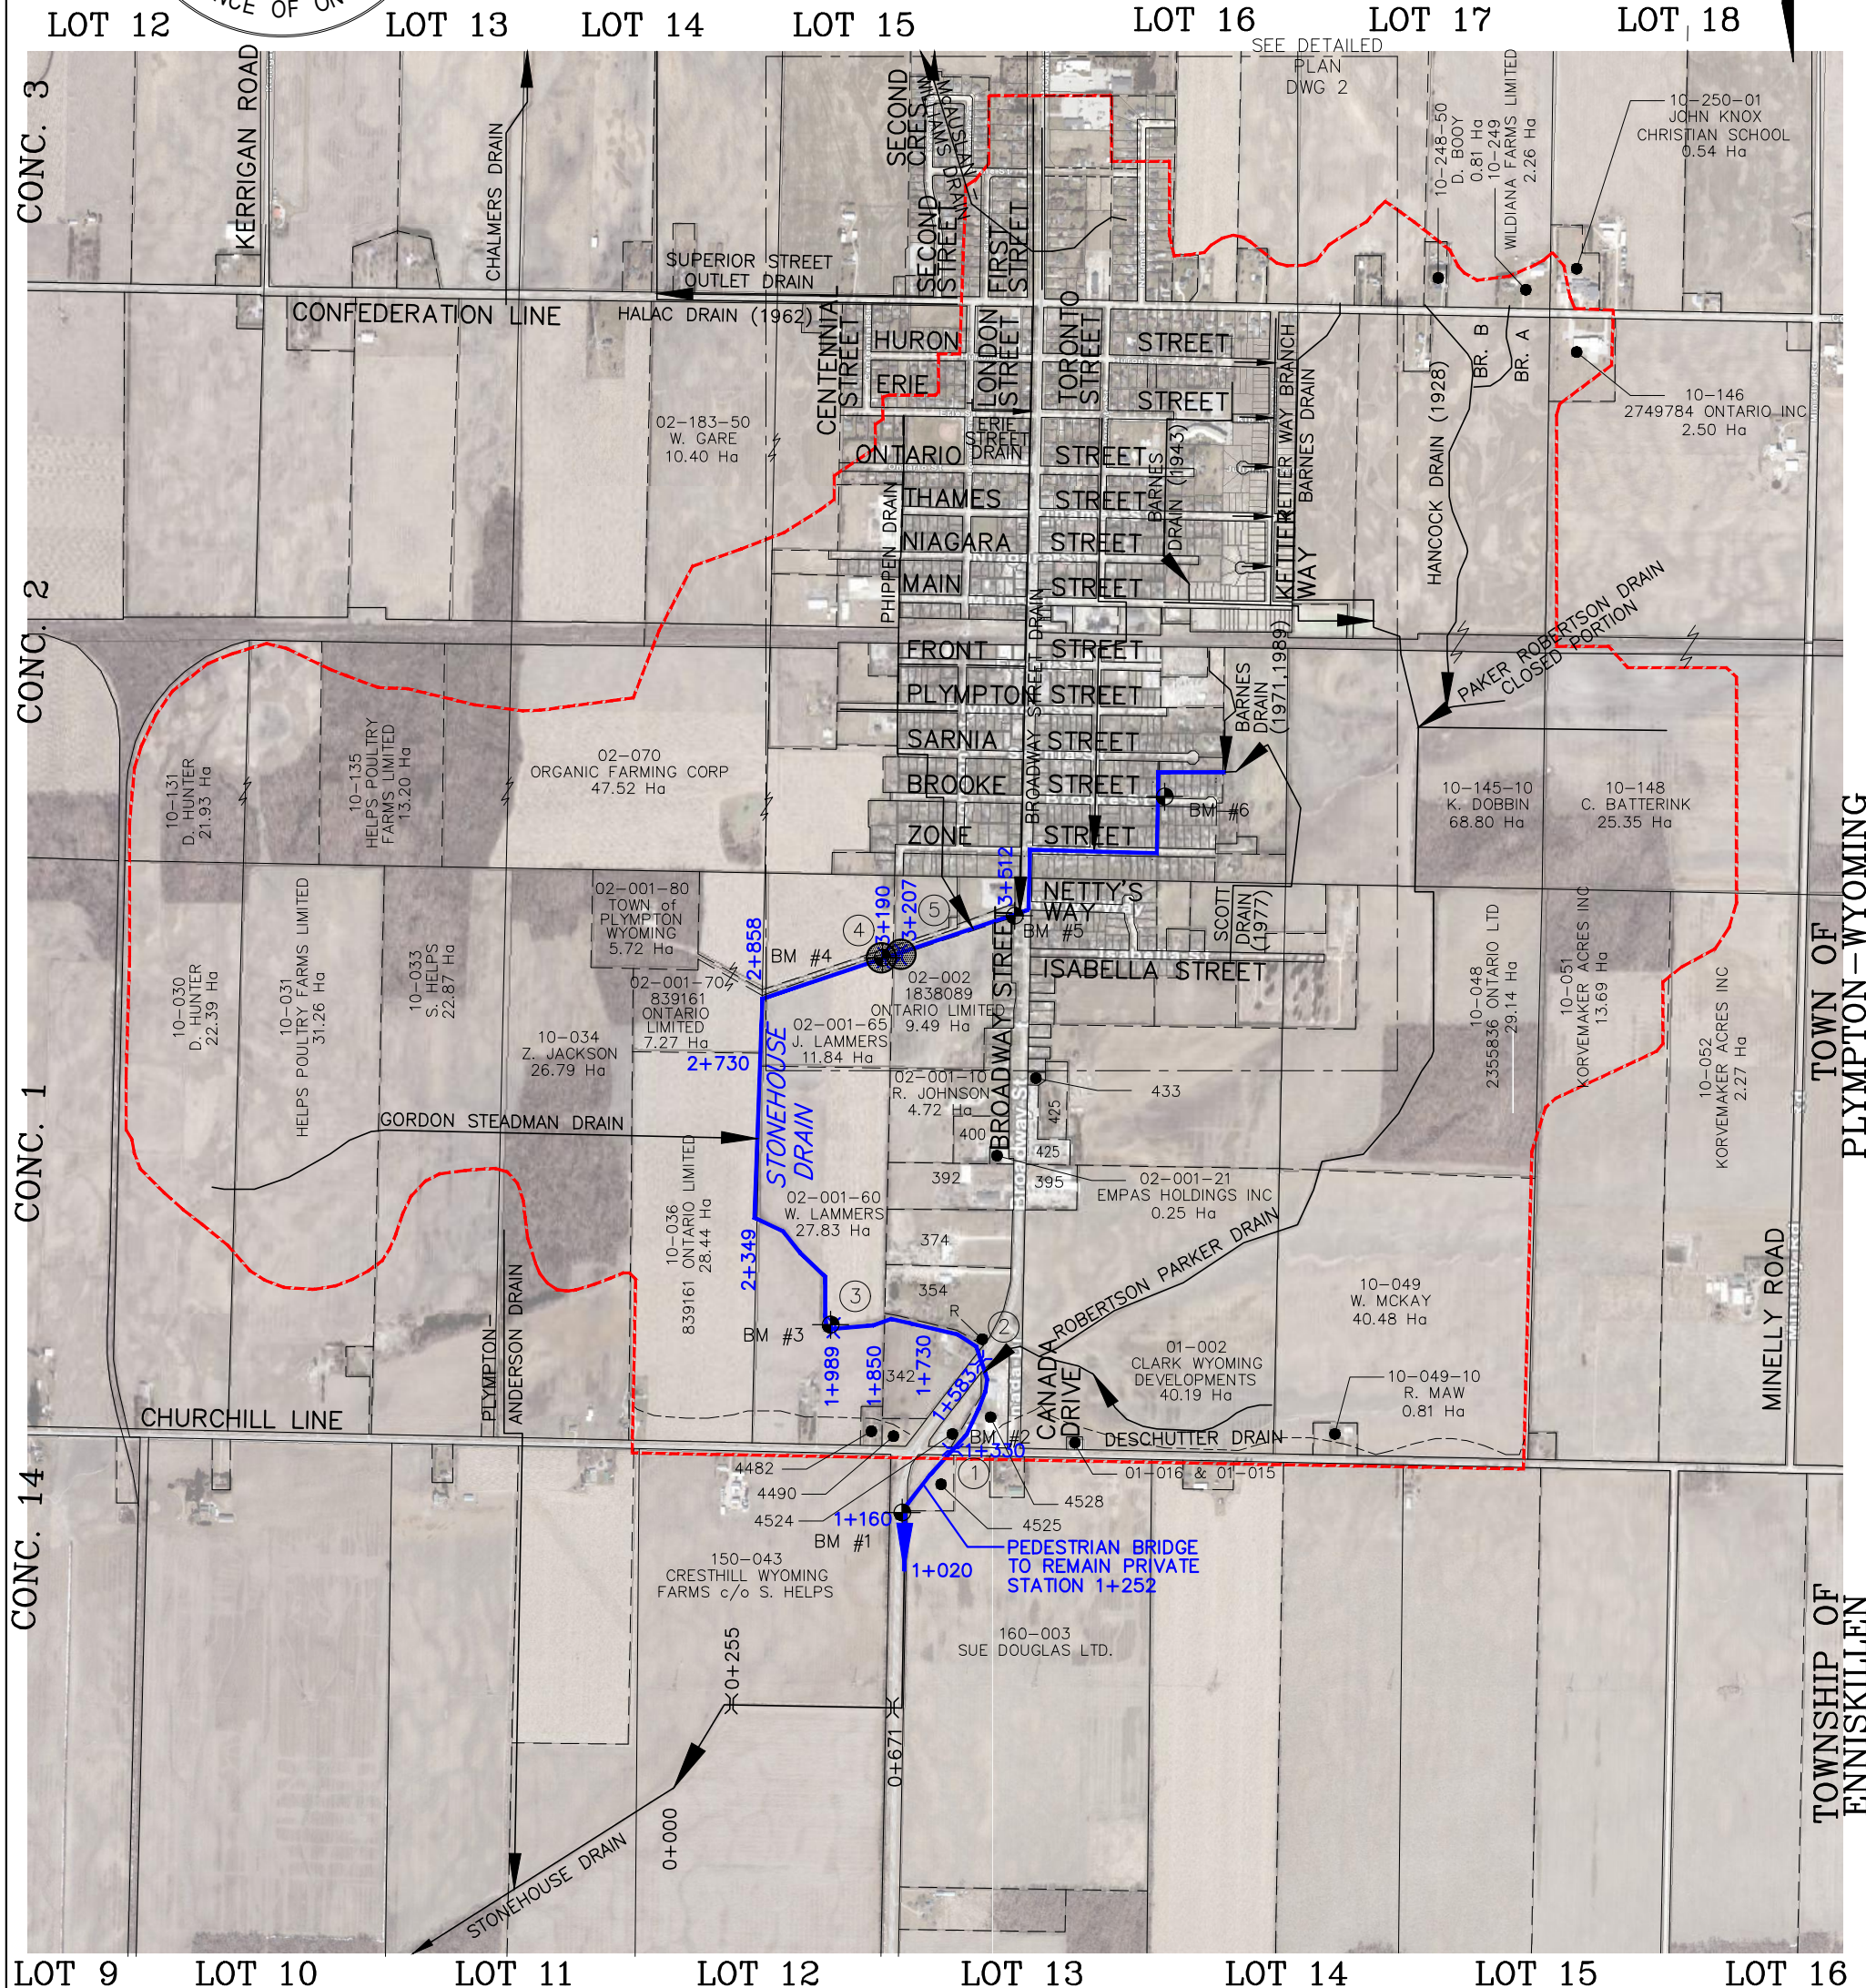

We recommend that you notify this office at least 10 days before starting your project and that a copy of this letter be kept on site while the work is in progress. It remains your responsibility to meet all other federal, territorial, provincial and municipal requirements that apply to your proposal.

If you have any questions with the content of this letter, please contact Jenica Pires by email at [Jenica.Pires@dfo-mpo.gc.ca](mailto:Jenica.Pires@dfo-mpo.gc.ca). Please refer to the file number referenced above when corresponding with the Program.

Yours sincerely,

Jenica Pires
